SUMMARY

Computer Engineering graduate with hands-on experience in frontend development (React, TypeScript, Tailwind CSS) and software QA (manual testing, Playwright automation, JIRA). Focused on building reliable, well-tested systems.

EXPERIENCE

Asteroid Studio

Sep 2025 – Present

QA Trainee

Dec 2025 – Present

- Designed and executed manual test cases aligned with product requirements and user flows.
- Tested features across staging and production, identifying functional and edge-case bugs.
- Logged and tracked issues in JIRA/Jam with clear reproduction steps and fix verification.
- Writing Playwright end-to-end test scripts to automate repetitive regression scenarios.
- Collaborated with developers to validate fixes and expand test coverage.

Frontend Intern

Sep 2025 – Dec 2025

- Built and maintained UI features using React, TypeScript, TanStack Router, Tailwind CSS, Shadcn/ui, and Material-UI.
- Collaborated with design and backend teams to implement responsive, interactive components.
- Wrote clean, reusable code following industry best practices.

Data Science Fellow | Equitech Futures

Oct 2025 – Dec 2025

- Built an interactive dashboard for African water utility managers using Python and Streamlit.
- Led a research study on youth-driven political engagement using Kathmandu Mayor Balen Shah as a case study scraped and analyzed six months of Instagram data, coded posts on clothing, visual setting, and context, and ran sentiment analysis on captions and comments.
- Synthesized findings into a structured analysis on political communication and public perception.
- Collaborated within a global cohort of professionals and academics to address social-sector challenges.

Fellow | Women Leaders in Technology (WLIT)

Oct 2024 – Mar 2025

- Gained hands-on experience with JavaScript, Node.js, Express, MongoDB, Git, and EJS.
- Developed SootheSphere, a sound therapy app with personalized soundscapes and mood-tracking journaling.
- Attended leadership sessions covering goal-setting, empathy, and time management.

Open Source Contributor | GirlScript Summer of Code (GSSoC)

Oct 2024 – Nov 2024

- Proposed feature enhancements — disappearing messages, search filters, resource categorization — across multiple open-source projects.
- Collaborated with international teams via issue tracking; contributed to GSSoC and Hacktoberfest.

EDUCATION

Bachelor of Engineering in Computer Engineering

2021 – 2025

Everest Engineering College, Pokhara University

High School Diploma (Science)

2017 – 2019

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++

Web Development: React, Node.js, Express, MongoDB (MERN Stack), TanStack Router, Tailwind CSS, Shadcn/ui, Material-UI

Testing & QA: Manual Testing, Test Case Design, Playwright (E2E Automation), Bug Tracking (JIRA, Jam), Postman

Data & Tools: Python, Streamlit, D3.js, OpenCV, OpenStreetMap, Socket.io, Git, MySQL, PostgreSQL

PROJECTS

Maze Generator *MERN Stack, D3.js*

Sep 2024

- Interactive maze generator with Kruskal's and Prim's algorithms and D3.js performance visualizations.
- Implemented heuristic-based Depth First Search (HDFS) for real-time maze solving.
- Won Best Project Award at Everest Engineering College.

DocuFind *OpenCV, Python*

Jul 2025

- Adaptive word-detection system for degraded documents (crumpled, low-contrast, varied fonts).
- Compared pixel-based and feature-based methods; built an 'Auto' mode that selects the best approach.
- Basis for IEEE-published research (see Publications).

Gantabya *OpenStreetMap, REST APIs*

Nov 2024

- Hyper-localized travel app for Nepali travelers with interactive trail mapping via OpenStreetMap.
- Users can add/share trails and checkpoints; real-time weather via OpenWeatherMap API.

Text Compressor *C++, Huffman Encoding*

Oct 2023

- Lossless file compression tool using Huffman encoding with file I/O and directory management.

SootheSphere *Node.js, MongoDB, EJS*

Oct 2024

- Sound therapy app with personalized soundscapes based on user mood and a journaling interface.

PUBLICATIONS

A. R. Magar and P. Khanal, "Word Detection Using Average Height and Inter-Character Gaps," 2026 International Conference on ICT and Photonics (ICTP), Kathmandu, Nepal, 2026, pp. 1–6. [doi: 10.1109/ICTP67998.2026.11485465](https://doi.org/10.1109/ICTP67998.2026.11485465)

CERTIFICATIONS

- Postman API Fundamentals Student Expert – Postman (Oct 2024)
- JavaScript Intermediate – Programiz (May 2025)
- Recursion with JavaScript – Programiz (May 2025)

ACHIEVEMENTS

- Best Project Award – Maze Generator (MERN, D3.js), Everest Engineering College
- 1st Place – Intra-College Coding Competition
- Selected Fellow – Women Leaders in Technology (WLIT) Fellowship 2024/25
- Open-Source Contributor – GirlScript Summer of Code (GSSoC) & Hacktoberfest
